INTRODUCTION

The worlds of professional football and cryptocurrency have become increasingly enmeshed over the past year. World Football is going to merge gaming with crypto-currency by establishing an ecosystem controlled mostly by users that enables them to transact both ways through our token, allowing gamers, investors, to earn money while immersed in a unique environment. World Football is a soccer game with the intention of attaining out to the global gaming community. The World Football platform offers NFTs of digital items in the World Football game, P2E, staking, and a reward-based event on the FIFA World Cup 2022.

World Football is a decentralized game aimed towards both online and offline soccer lovers. The World Football platform's rewards system will be built on blockchain technology. During the FIFA World Cup 2022, World Football will have a P2E event in which players may trade in-game products on a decentralised marketplace. Players in World Football are awarded based on their weekly rankings. World Football will also organise a P2E event during the FIFA World Cup 2022. The top three leaders of the week receive a Qatar flight and hotel stay, or a cash incentive if the hotel and trip are not desired.

Crypto staking has developed as a new trend in the cryptocurrency market, owing to the increasing popularity of cryptocurrencies. Crypto staking is the practise of retainin currency or assets for the sake of profit. Staking also acts as proof of stake for blockchain transactions (POS).

These actions aid in the validation of crypto networks. Staking is a different way of providing security and efficacy to the blockchain network in exchange for a monetary payment while preventing resource waste.

NFTs are unique, non-replicable cryptographic tokens that function as assets in the digital realm. World Football NFT is a vital component of our NFT ecosystem. Non-fungible coins (NFTs) are one-of-a-kind, non-transferable assets that are minted on-chain. These tokens may be tied to anything, including a digital World Cup token. World Football NFTs provide buyers access to a variety of digital assets, mostly cryptocurrencies. World Football NFTs in the Soccer game ensure that the user's asset is always available.

VISION

We aim "cryptocurrency to be in every portfolio". We envision a society in which wealth building tactics that were previously solely available to affluent people are made open to everyone, restoring people's control over our financial institutions. World Football will build a revolutionary football gaming ecosystem to attract more people to digital assets. It will create a safe and secure legal gaming platform that is positioned for global adoption with no limitations, allowing users to earn a handsome income while maintaining their privacy, security, and autonomy. We want to identify the talents working with the current Agent network. We envision promoting our many revolutionary programs like NFT, P2E, Rewards, DAO, and Giveaways.

MISSION

Our mission is to "Lift World Football to New Heights" by offering investors an innovative, user-friendly, one-stop shop to find everything they need and providing every person in the world an equal chance to manage and improve their financial security by participating in the football gaming ecosystem. We will be a football ahead NFT community Agents for new football players.

Our goal is to combine gaming with cryptocurrency by creating a user controlled ecosystem that allows users to transact both ways using our token, allowing gamers, and content producers to make money while immersed in a unique world.

Our Mission is to Identify potential Talent working with current Agent Networks.

- Link in with International Agencies
- Access to scout for talent.
- Launching our online training course for only agent SFA certified.
- Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.
- Support Kids in deprived Areas or schools and Offer sports Facilities in the area by charity.
- We are going to be on blockchain network, we will launch our token, named as World Football token.

STAKING

With the growing popularity of cryptocurrencies, crypto staking has emerged as a new trend in the cryptocurrency industry. The hold of cash or assets for the sake of profit is known as crypto staking. They are set up with blockchain techniques that allow crypto records and their generated data to be stored on blockchain. These steps help a blockchain network's operations and security. Staking also serves as proof of stake for transactions on the blockchain (POS).

These activities help crypto networks achieve validation. The key idea behind staking is that shareholders keep their crypto equities in digital wallets in order to benefit, while investors store the data and verify and authenticate it. Proof of Work chains confirm and generate new blocks using the staking mechanism. World Football offers stakeholders prizes in the form of NFTs, which are the games' digital assets and will be used in the game.

Staking is an alternate approach of delivering security and efficacy to the blockchain network in exchange for a monetary reward while avoiding the waste of resources. It is built on the Proof of Stake consensus mechanism, which uses staked currency to produce new blocks rather than energy.

For investors hoping to generate more money with fewer resources, cryptocurrency staking has become the new draw. It simply entails storing funds and reaping returns from them. It works in the same way as a bond would. There are several advantages to staking cryptocurrency. It is possible to do it without using the internet, which means that the stocks in the digital wallet continue to grow even if you forget. Staking benefits are determined by your investment strategy; the more you invest, the more possibilities you have to win rewards.

STAKING BENEFITS

LESS ENERGY

Staking requires less processing power, which minimises energy consumption. This is one of the most important indications of staking success. Because it uses less energy, it is more ecologically friendly than mining, which requires a lot of energy and potential. WORLD FOOTBALL Staking may be done with any basic mobile phone or laptop.

WITHOUT INTERNET

Another advantage of staking is that it may be done without using the internet. In the cryptocurrency realm, this is known as "cold staking", which refers to the staking of coins without the need of an internet connection. You can retain the stock in your wallet and collect interest even if you forget you're staking. Staking requires only a minimal investment.

THE ABILITY OF MINING

A miner can also stake in order to add new blocks to the network. Making a refundable deposit to verify that you have invested in the benefit of whatever you're mining off is what staking is all about.

SIMPLE & SAFE

Staking is simple and risk-free. It is far more effective against assaults with a financial cost. Aside from that, staking requires only it and not much expertise. The process is to purchase coins on the market and deposit them. This raises the value of coins in your digital wallets.

GUARANTEE OF PAY

The coin's market value rises, increasing the value of staked coins. As a result, crypto staking provides a fixed and predictable source of income from time to time. This method is far more profitable than putting money in a savings account since profit is assured through staking.

GAMING OVERVIEW

The gaming sector seems to be among the first to adopt Blockchain technology, and blockchain gaming is the future of gaming. The blockchain and gaming worlds are now very much in sync. People who are interested in blockchain are also likely to be interested in and engage in gaming. The prevalence of NFTs in the gaming industry highlights this, with many rare and valuable NFTs exchanged within games.

Blockchain technology is an essential component of future financial technologies. The notion of an incorruptible ledger is gaining popularity outside of the realm of crypto disputes. Through our Blockchain and Smart Contract Technology, the World Football platform will improve the gameplay experience for both players and developers. The World Football Gaming Platform provides all users with a completely transparent, safe, and secure environment. It lets players to store their game things and trade, sell, and buy in-game items on a decentralised cutting-edge marketplace. We want to build a gaming community where players can communicate and exchange knowledge while playing their favourite games. We seek to bridge the gap between the online and offline gaming worlds. World Football, a mobile game platform, will use blockchain technology for its rewards system as part of our strategy. World Football is a decentralised soccer game designed to appeal to both online and offline soccer fans. World Football will offer a P2E event during the FIFA World Cup 2022. The top three leaders of the week are awarded a Qatar flight and hotel or a cash incentive if they do not want the hotel and trip.

GLOBAL GAMING INDUSTRY

The growth of social networks, cellphones, and tablets in recent years has given rise to new genres such as mobile and social games. Since the first games were released in the 1970s, video games have come a long way. Today's video games have photorealistic visuals and, in many cases, accurate simulations of reality.

The value of the global video game market is depicted in this timeline below. The market was valued around 115 billion dollars in 2018, with sales likely to exceed 138 billion by 2021, according to sources.

As user involvement with gaming rose during the worldwide COVID-19 epidemic, the average number of in-app purchases per paying user climbed to an all time high across all gaming genres in 2020. Platformers are the most profitable free-to-play genre, according to another poll of mobile game creators.

P2E

Play-to-earn is one of the fastest growing genres in the gaming market today. World Football has opened the door for crypto gamers and developers around the world, otherwise believed to be out of reach for the majority. Rewards earned can be transferred and sold on exchanges and can even be converted into fiat if the user so desires. This provides incentive to play, giving projects a large, sustainable user base. Everyone can play. Everyone can win. Everyone is included. Play to Earn indicates that you may earn money or valuable things just by playing the game. This is demonstrated in Gods Unchained by the opportunity to gain in-game things that you can either sell for real money or utilize to help you become more competitive in the game. To us, the inevitable future of gaming is to provide players with things they can own, destinations they can trade, and incentives for their time. The next piece of the ecosystem is to incorporate really satisfying and sustainable Play to earn features. NFTs and World Football tokens have provided us with the tools to pave the way for this future. The World Football token is our answer to this problem, and it's built to be the foundation of World Football Play to Earn economy. With the global pandemic stretching into 2022, many are turning to P2E gaming as an income source, with many of these participants being from geographical locations described as impoverished and poor. We are happy to not only provide great game for our community to enjoy, but to provide opportunities to earn in times where nothing is certain. We here at World Football plan on developing a fun and interactive game for our community as well as many economic opportunities while playing our games. World Football is a decentralised soccer game aimed towards both online and offline soccer lovers. World Football is a P2E game in which players are rewarded depending on their weekly ranks. During the FIFA World Cup 2022, World Football will also host a P2E event. The top three leaders of the week receive a Qatar airfare and hotel stay, or a cash reward if they do not desire the hotel and trip.

NFTS

NFTs are non-replicable and customised cryptographic tokens that are regarded as assets in the digital world. They may be bought, owned, and sold just like any other tangible property. To ensure that the ownership of the tokens stays distinct and verifiable, effective blockchain technology is used. Developers are keen to include NFT development into the gaming experience. NFTs are intended to increase market efficiency, notably when dealing with cryptocurrency. In an ideal world, these gadgets would enable you to turn physical assets into digital ones, so eliminating intermediaries and optimising supply chains. Everyone is looking forward to increased protection for their digital assets, and NFTs deliver unrivalled safety and security. Stakeholders may be certain that they will be protected against fraud in the long term due to blockchain.

World Football FT is a vital part of our ecosystem dealing with NFT'S. Non-fungible coins (NFTs) are unique, non-interchangeable assets, minted on-chain. World Football NFT is the Gaming themed series of NFT Creation and trading platforms, Unlike general NFT trading platforms, World Football NFT will be the decentralized protocol that supports NFT creators, buyers and sellers. These tokens can be linked to anything from digital World Football token. The core attributes of NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary. We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. World Football is a widely known NFT project. The underlying token for each Football Agent encodes a unique genome that defines its appearance, traits, and hereditary lineage. Football Agent cannot be replicated and cannot be transferred without the user's permission. World Football NFTs provide purchasers with access to many types of digital assets, primarily cryptocurrencies. Owning these assets gives you enough flexibility to expand. Simultaneously, World Football NFT enables numerous purchasers to hold a share in a single organisation. Because of the growing value of cryptocurrencies, shared ownership is critical. World Football NFTs in the Soccer game guarantee that the user's property remains accessible regardless of the scenario. In the unfortunate event that the game server fails or ceases completely, all gathered items will become inaccessible. World Football NFTs, on the other hand, ensures that such blunders do not occur. Even if the game is entirely shut down, World Football NFT stuff will remain accessible to its users.

WHY WORLD FOOTBALL

MARKETING & HIGH REACH

We want to focus a lot on marketing because this is the most important thing to keep a project alive. We say this because we have years of experience in the crypto and blockchain business and have generated over multi million dollars. For this, we will be putting a large part of our wallet into marketing which will take the our project to another level.

LOW GAS FEES

The fees associated with World Football token transactions are far less than those associated with debit, credit cards as well as wire transfers, and BACS payments. World Football token is a secure and private cryptocurrency that keeps the investor's assets anonymous without compromising security.

EASE OF USE

The fact that World Football is simple to use contributes to its worth. You will need a smart device and an internet connection to become an investor right away.

TRUST

It is hard to overestimate the value of trust in the cryptocurrency market. That entails complete transparency in terms of community support and development and terms of any security-related initiatives. Examples include high-quality audits of the blockchain code to decrease the possibility of harmful activity significantly.

LONGEVITY & REWARDS

World Football is committed to the game for the long run. The decentralized community is promoting the long-term development of the ecosystem, which will result in real-world applications, more incentives, and increased popularity in the long run.

GLOBAL IMPACT

We want everyone throughout the world to no longer have to deal with gas fees when they want to buy an NFT from us and also we want everyone throughout the world to be connected with our Marketplace.

COMMUNITY – FOCUSED

Community is the number one value of the World Football ecosystem. In the beginning, we asked if a project could succeed on the back of a decentralized, community effort. World Football prevailed due to the strength of its community members and investors. Our collaborative, Like-minded community is the bedrock of the project.

TRACEABILITY

World Football is traceable where we can trace the creator and previous owners. There is a code behind it and it is traceable. It is traceable and may be used to identify the creator, as well as provide a list of the first and last Holder purchases.
